

The Image Was Shared: Quiz

Name: _____

Class: _____

Circle the best answer for each question.

1. A private image was shared without consent. Whose fault is it?

- ☐ a) The person in the image, for sending it
- ☐ b) The person who shared it without consent
- ☐ c) Nobody's
- ☐ d) Everyone who saw it

2. What should you save as evidence?

- ☐ a) The image itself
- ☐ b) Usernames, links, the app, date, time and messages
- ☐ c) Nothing, just delete everything
- ☐ d) A screen recording of the image

3. Someone sends you a classmate's nude. What should you do?

- ☐ a) Forward it to one friend to ask what to do
- ☐ b) Ask the classmate about it
- ☐ c) Don't forward it; report it, delete it and get help for the person
- ☐ d) Ignore it and keep it

4. How does Take It Down work?

- ☐ a) You upload the image to a website
- ☐ b) It makes a digital fingerprint on your device so platforms can block copies
- ☐ c) It deletes the image from every phone
- ☐ d) It finds out who shared it

5. True or false: if the image is fake or AI-made, it isn't serious.

- ☐ a) True
- ☐ b) False

Answer key

#	Answer	Why
1	b) The person who shared it without consent	Even if someone sent or agreed to the image, that never gives anyone permission to share it.
2	b) Usernames, links, the app, date, time and messages	Document where it was shared, not the image. Don't create extra copies.
3	c) Don't forward it; report it, delete it and get help for the person	Don't forward or gossip. Report, delete, and help the person get support.
4	b) It makes a digital fingerprint on your device so platforms can block copies	The image never leaves your device. Only use it if the image is already on your device.
5	b) False	The image may be fake, but the harm is real. Save the context, report and get support.
