Answer key

#	Answer	Why
1	b) Many small taps: post, forward, react, comment	Each person thinks their tap barely matters. For Maya, they all arrive at once.
2	b) No. Seeing something doesn't give you permission to spread it	Consent matters for photos and videos, even when the content isn't sexual.
3	a) Would I send this if they were standing beside me?	That one question changes a lot of online behavior.
4	b) Someone who interrupts harm or supports the person	An upstander doesn't need to be a hero. Sometimes it's one message.
5	b) False	It also includes what you like, share, comment on and help spread.
